Invited Talk 1 8

Cognitive Aspects of Designing, Generating and Using Domain Ontologies
Gerhard Budin

Invited Talk 2 9

How to Build a Termbase for 500,000 Users (and Live to Tell the Story)
Michal Boleslav Měchura, Brian Ó Raghallaigh

Papers

1. Knowledge Extraction and Multidimensionality in the Environmental Domain
   Pilar León Araúz, Arianne Reimerink

   Marie-Claude L'Homme, Patrick Leroyer, Benoît Robichaud

3. Generating Lexical Information for Terminology in a Bioinformatics Ontology
   Hammad Afzal, Paul Buitelaar, Philipp Cimiano

4. When Definitions are not Enough
   Michal Boleslav Měchura

5. Communicational Model for the Terminological Definition
   Maríà Pozzi

6. Towards a Model for Terminology Planning
   Abolfazl Zar nikhi

7. Developing and Using Terminology Resources: The Case of EU Terminology
   Judith Kast-Aigner

8. The Electronic Resources of the Lithuanian Terminology
   Albina Aukšoriūtė, Jolanta Gaivenyte-Butler
9. Irish Language Terms for Legal Translation
   Fionnuala Croke, Gearóid Ó Cléircín
   24

10. Developing Welsh Language Terminology in the Higher Education Sector in Wales
    Tegau Andrews
    25

    Teresa Cabré, Amor Montané, Rogelio Nazar, Gabriel Reus
    26

12. Dealing with Lexicon Acquired from Comparable Corpora: Validation and Exchange
    Estelle Delpech, Béatrice Daille
    27

13. Layout on Different Terms?
    Henrik Nilsson
    28

14. A Variational Linguistic Approach to Term Extraction
    Dirk De Hertog, Kris Heylen, Dirk Speelman, Hendrik Kockaert
    29

15. Corpus Genres and Contrastive Automatic Term Extraction
    Patrick Drouin, Frédéric Doll
    31

16. ARGs in Teaching Terminology
    Georgeta Ciobanu
    33

17. BACUS (Base de Coneixement Universitari – University Knowledge Base): 14 Years on Terminology Applied to Translation
    Anna Aguilar-Amat, Bartolomé Mesa-Lao, Marta Pahisa-Solé, Pilar Sánchez-Gijón
    35

18. The TermWise Knowledge Platform: an Efficient Translation and Terminology Management Suite for Legal Translation in Belgium
    Kris Heylen, Hendrik Kockaert
    36

19. EcoLexicon: Contextualizing an Environmental Ontology
    Pilar León Araúz, Pedro Javier Magaña Redondo
    37

20. Reaching the User: Targeted Delivery of Federated Content in Multilingual Term Bank
    Andrejs Vasiljevs, Signe Rirdance
    38

21. Transmission of Knowledge about Concept Relations in Terminological Vocabularies
    Anita Nuopponen
    40

Workshop 1
Can Quality be Assured in the Language Industry?

Workshop 2
Accommodating User Needs for ISO 704: Towards a New Revision of the Core International Standard on Terminology Work

Workshop 3
Terminology Management Business Models in Localization Environments: Challenges and Change

Workshop 4
A Model for Future Integrated and Federated Content Repositories

Workshop 5
Standardizing Data Categories in ISOcat: Implementing Group Work for Thematic Domains

Workshop 6
Establishing and Using Ontologies as a Basis for Terminological and Knowledge Engineering Resources

Perspective and Scale in Classification
Esben Alfort

Is it Possible to Enrich Ontologies with a Specialized Domain Linguistic Resource?
Maria A. Barrios & Luis M. Vilches-Blázquez

TermFactory: Collaborative Editing of Term Ontologies
Igor Kudashev, Lauri Carlson & Irina Kudasheva

Automatic Ontology Construction for a National Term Bank
Bodil Nistrup Madsen, Hanne Erdman Thomsen, Jakob Halskov, Tine Lassen

Foreword

Fiontar, Dublin City University is delighted to host the TKE (Terminology and Knowledge Engineering) Conference 2010.

Fiontar has been involved in providing terminology resources for Irish since its establishment in 1993, and the school now conducts its teaching and research in a range of disciplines: business, management, communications, information technology and sociolinguistics. At the time of its foundation, no other university was offering courses in finance, computing and enterprise through the medium of Irish, and there were large deficits in terminology provision. Fiontar has, therefore, always had a terminologist on its staff.

Seventeen years later, Fiontar is conducting cutting edge research in developing electronic resources for the Irish language, especially in terminology and placenames. Its research projects are rooted in the use of digital resources such as databases, Internet tools and corpora, to provide terminological and placename materials to researchers and to the global Irish-speaking community. The resources are developed by a team of researchers in collaboration with Irish State agencies and EU institutions with national and European funding.

‘Focal’, in Irish, means ‘word’, and is pronounced [fɔkəl]. Focal.ie, the national terminology database, was developed by Fiontar, using software developed in-house. The editorial team input, checked and amended all available material, and terminology has been added continuously since then, as it is developed and approved by the National Terminology Committee (Foras na Gaeilge), the statutory body responsible for terminology development in the Irish language. There are over 300,000 terms in focal.ie, and about 750,000 searches were performed per month on the site in early 2010.

Other terminology projects in Fiontar include research into a new dictionary of sport; the digitisation and extraction of terms from statutory instruments; and the development of terms for the IATE
The Association for Terminology and Knowledge Transfer is co-organizer of the conference series TKE – International Conference of Terminology and Knowledge Engineering, and we present here a brief overview of the history of the association and its activities.

GTW was founded in Trier in 1986 with the German name Gesellschaft für Terminologie und Wissenstransfer, hence the abbreviation GTW which is commonly used also by English speakers. It is an international forum for the promotion of knowledge and technology transfer by means of research and development with regard to technological procedures for special language communication on the basis of terminological procedures and data. As such it was a part of the Global Group of Terminology Organisations.

Particular attention is paid to the computer-specific representation, maintenance and adaptation of information and knowledge. The task of the Association for Terminology and Knowledge Transfer includes the organization or co-organization of symposia, congresses and workshops, among them TKE.

Up until around 2000, the association was involved in many other activities, concentrated on programme and working groups. The programme groups discussed the scientific position of the Association with regard to long-term objectives, whereas the working groups implemented clearly defined projects within a certain time limit. 5 programme groups and 13 working groups were established which did not operate all at the same time.

The 5 programme groups were:

- Terminology, knowledge theory, knowledge engineering
- Terminology of knowledge engineering
• Harmonization and standardization
• Forecasts on knowledge engineering
• Impact of the development of knowledge engineering on working conditions and society

The following working groups were active in the period:

• Conception of terminological knowledge banks
• Planning and construction of terminological data banks (TDB)
• Computer-aided terminology work by experts
• Interfaces between TDBs and other computer as well as communication systems
• Man-machine interaction with TDBs
• Professional profile of terminologists and knowledge engineers
• Training for a profession linking computer science and design and application of knowledge systems
• Expert workstations in the natural language field
• Terminology documentation in translation
• Terminology documentation in interpretation services
• Criteria for the evaluation of terminology management systems
• Terminology relevant information in the world wide web
• Working procedures in terminography

In 2005, GTW was reorganized and moved to Copenhagen. The members of the association are active in many other contexts, and therefore, in recent years, the only activity of the association is the organization of the International Conferences of Terminology and Knowledge Engineering, and the general assembly of the association is held during the conference. This should not discourage members or potential members from proposing and actively taking part in other types of activity.

TKE conferences

The international TKE conferences are held in Europe, co-organized by the Association for Terminology and Knowledge Transfer and the local university hosting the conference. Usually a special theme for the conference is chosen and proceedings are published. 100 - 350 scientists, developers and users from the fields of terminology, computer science, documentation, computer linguistics and related subjects participate in each of these congresses, presenting research results, ongoing research and experience from practical work.

• TKE’87: Terminology and Knowledge Engineering, Trier, Germany.
• TKE’90: Terminology and Knowledge Engineering, Trier, Germany.
• TKE’93: Terminology and Knowledge Engineering, Cologne, Germany.
• TKE’96: Terminology and Knowledge Engineering, Vienna, Austria.
• TKE’99: On the way to Multilingual Information Markets, Innsbruck, Austria.
• TKE 2002: Computational Terminology for Information Accessibility and Organization, Nancy, France.
• TKE 2005: Terminology and Content Development, Copenhagen Business School, Denmark.
• TKE 2008: Managing Ontologies and Lexical Resources, Copenhagen Business School, Denmark.
• TKE 2010: Presenting terminology and knowledge engineering resources online: models and challenges, Dublin City University, Ireland

Acknowledgements

We would like to thank all the conference and workshop organisers and participants, and particularly the authors published here.

The members of the Programme Committee were: Anita Nuopponen, Birthe Toft, Bodil Nistrup Madsen, Bolette S. Pedersen, Caoilhionn Nic Pháidín, Changqing Zhou, Dorothy Kenny, Frieda Steurs, Gerhard Budin, Gerhard Heyer, Hanne Erdman Thomsen, Håvard Hjulstad, Henrik Köhler Simonsen, Jae Sung Lee, Johan Myking, Kara Warburton, Katja Hallberg, Kiril Simov, Lise Mourier, Lotte Weilgaard, Maria Teresa Cabrè, Marie-Claude L’Homme, Nicoletta Calzolari, Peter Sandrini, Rute Costa and Sun Maosong. We thank them for the time they took to review and comment on submissions.

The members of the Organising Committee were: Fidelmá Ní Ghallchobhair (NSAI and Foras na Gaeilge), Bodil Nistrup Madsen (CBS and GTW), Hanne Erdman Thomsen (CBS and GTW), Klaus-Dirk Schmitz (Fachhochschule Köln and GTW), Anja Drame (InfoTerm), Robin Lombard (Microsoft) Marie Wallace (IBM), Fionnuala de Barra-Cusack (DCU) and Úna Bhreathnach (Fiontar, DCU).

Ciara Ni Chuilinn, Edel Ni Mhuirrthile and Caoilhionn Nic Pháidín all helped with the preparation of the Proceedings.
